

YOLOv8 Nano Validation Report

Dataset: Zenodo Images.zip (person vs background)

Model: YOLOv8 Nano

Key Metrics:

- mAP@0.5: ~0.392
- Best F1: ~0.45 at confidence ~0.107
- Person recall ~0.33; precision high at high thresholds

Observations:

- High precision at high confidence indicates low false positives.
- Low recall means many persons missed, improvements needed.

Recommendations:

- Use data augmentation.
- Try larger models (YOLOv8s, YOLOv8m).
- Lower thresholds in deployment to increase recall.
